

Too much water can cause problems for most plants. These plants can tolerate and even thrive in soggy situations, such as an area surrounding a splashing fountain, the edges of a pond, or a low-lying spot that is always damp. A few of these plants even tolerate standing water.

**DROUGHT** = Tolerates Seasonal Drought   **BOG** = Tolerates Standing Water

	LATIN NAME / COMMON NAME	LIGHT	DROUGHT	BOG
FERNS	<b>Adiantum pedatum</b> / Maidenhair Fern
