

**KEEP IN MIND:** There are no plants that are truly 100% rabbit proof. The ones on this list will bounce back quickly after being nibbled on, or have plant material that will not be appetizing to rabbits, except as a last resort. Plants may also be more susceptible to damage in the early stages of growth, so offering protection at first may be helpful.

BOTANICAL NAME	COMMON NAME	LIGHT LEVELS
<b>ANNUALS</b>		
Ageratum	Floss Flower	☀️
Alyssum	Alyssum	☀️
Begonia semperflora	Wax Begonia	☁️
Browallia	Browallia	☁️
Calendula	Pot Marigold	☀️
